Caio Bento

Full Stack Developer & Automation | React, Next.js, Node.js, Python, TypeScript, n8n | AI Integrations

Nova Friburgo, Brazil · Remote • caiobentoodev@gmail.com • linkedin.com/in/caiobentoo • github.com/caiobento7

SUMMARY

Full Stack and Automation developer experienced in modern web applications, system integrations and AI-driven solutions. At Nexly Group, owned every frontend interface in the company while designing and shipping critical n8n automations connected to databases, REST APIs and AI agents. Designed and built Silva Nutrition's first sales and support AI, running on WhatsApp with WooCommerce integrations, order tracking and automated customer service. Experienced in large-scale data migration, dashboards and monitoring alerts that protect production systems.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Angular, TailwindCSS
Backend & APIs: Node.js, Python, REST APIs, Webhooks, Supabase, PostgreSQL, SQL
Data: Large-scale migration, ETL with n8n, PostgreSQL, Apache Beam, WooCommerce API
Tooling: Git, GitHub, Google Cloud (GCP), CI/CD, Vercel
Automation & AI: n8n, Conversational AI agents, LLMs in business workflows, WhatsApp Business API
Web automation: Python, Selenium, Playwright, requests
Infra & Support: AnyDesk, TeamViewer, Virtual machines, Active Directory (basics)

PROFESSIONAL EXPERIENCE

Adapt Edtech | Full Stack Developer

Jul 2026 – Nov 2026 · Remote

- Built Adapt Liviu, an education technology ecosystem for creating, managing and analyzing content, used by schools and corporate L&D teams, and Liviu Hub, the company's corporate learning platform
- The platform covers content production workflows (Liviu Flow), collaborative authoring with SCORM export (Liviu Content), learner journey and performance analytics (Liviu Analytics) and AI features for text review and image generation
- Web interfaces with React, Next.js and TypeScript, integrated with APIs and backend services
- Shipped features and improvements to production systems using Git and a collaborative workflow
- Remote user support via AnyDesk and TeamViewer

Nexly Group Solutions | Full Stack Developer & Automation

Jul 2025 – Aug 2026 · Remote

- Owned every frontend interface in the company, building React, Next.js and TypeScript web apps for B2B products in production
- Designed and built Silvinha, Silva Nutrition's AI agent and the company's first sales and support AI, running on WhatsApp with WooCommerce integrations through REST APIs and webhooks
- Designed and shipped 10+ critical n8n automations, including the migration of 100,000+ records from WooCommerce to Supabase in a single optimized workflow
- Built an alerting system that monitors tool disconnections, preventing failures that would compromise the production database
- Dashboards and features for internal web apps, wiring the frontend to APIs and backend services
- Remote user support via AnyDesk and TeamViewer

Pixtrade.IO | Software Developer Trainee — May 2024 – Sep 2024 · Remote

- Built a support bot that triages and qualifies customers before human support, cutting average handling time from 20 to under 5 minutes
- Python and SQL scripts and automations to streamline internal processes
- Built and maintained integrations between systems and APIs for data processing
- Collaborated on data analysis and data handling solutions for the platform

---

EDUCATION

B.Sc. in Computer Engineering (in progress): **Rio de Janeiro State University (UERJ)** · 2023 – 2027

SELECTED PROJECTS

CursoLab: online course platform · Academic project · Software Engineering

A complete course platform: students buy courses, watch lessons, take quizzes and earn certificates; admins build content and track metrics.

Impact: Live on Vercel, with a static frontend and a serverless API on the same domain.

Tech: React 19, Vite, Node.js, Express 5, Supabase, PostgreSQL, jsPDF · plataforma-cursos-omega.vercel.app

Support hub with Slack and Jira · Nexly Group

An end-to-end web app that centralizes support requests: the customer opens a ticket in the UI and everything else happens automatically.

Impact: Fully automated triage and no more requests scattered across channels.

Tech: Next.js, Node.js, Slack API, Jira API, REST APIs

Silvinha: WhatsApp sales AI · Silva Nutrition · Nexly Group

An AI agent that sells, tracks orders and answers questions right inside WhatsApp. It was the company's first sales and support AI.

Impact: The company's first automated sales channel, with higher conversion and less friction at checkout.

Tech: n8n, WhatsApp Business API, WooCommerce API, Webhooks, Supabase, PostgreSQL

100k-record data migration · Nexly Group

Migrated 100,000+ records from WooCommerce to Supabase through a single optimized n8n workflow, keeping the data consistent end to end.

Impact: 100% of the data migrated with zero manual intervention.

Tech: n8n, WooCommerce API, Supabase, PostgreSQL, REST APIs
